complaints incident to FEMALES. Its mild, alterative properties render it pecu-iarly applicable to the slender and delecate constitution of the female. It is unrivalled in its effects upon such diseases as incipient consumption, barrenness, leucorrhæa, or whites, irregular menstration, incontinuence of urine, and general prostration of the system. It immediately counteracts that distressing nermale frame, and imparts an energy and buovancy as surprising as they are grateful. We have evidence on file which induces us strong-ly to recommend this medicine to married peo-
